

Important Notes

Condition:

For every record you will find two numbers the first for optic and the second for acoustic condition. In the case the acoustic Number is more bad, the sound is not so good like we can see . For example a record is 2- / 3+ that means good conditions but it makes a bit background sound. The Size of Scratches and Needleholes will be marked by how often you can hear an Sound for Example **NL 4x** All Records 10 Inch are told otherwise. Country of Pressing by Car -Number, for Example D for Deutschland Germany. US - United States.

Optical

+ Not used only one or two times
2 the pleasure of every Collector
-
+
3 Normal used not grey normally
-
+
4 Very often used Grey
+
5 For Documentation but it runs

Acoustic

No Background-Sound

Background-Sound but good to hear

All sorts of Background Sound but all to understand

6 Documentation do not run
